

## “Preparation for typhoons”

- 1 Prior to a typhoon approaching, check around your house.
- 2 When a typhoon is approaching, please go home as early as possible and stay at home.
- 3 In preparation for a blackout, you should prepare a flash light and a radio.
- 4 You are also recommended to prepare water and food as the water supply may be disrupted.
- 5 If you think it's dangerous staying home, you should evacuate as soon as possible, before the typhoon comes closer.
- 6 Please check the items that you will take with you in emergency in advance.
- 7 In preparation for flooding, place your valuables, clothing, sleeping mats, etc. in a high place.
- 8 Even though a typhoon has passed, you should be still careful about strong winds and heavy rains.
- 9 Please watch out for fallen electric wires that may touch housings.
- 10 If your house is exposed to flood water, please look after sanitation.
