

Nagano Prefecture

----Updates on Local Radiation Levels----

Nagano Prefecture is conducting the measurement of radiation levels in the air at its Environmental Conservation Research Institute (Amori, Nagano City) on a regular basis.

The facts are listed below:

Readings of Radiation Levels in Air

Data of the environmental radioactivity level monitored at Environmental Conservation Research Institute are listed below and the level will not have an effect on human health.

Reading as of 9:00 March 31 (Thu)

Reading (μ Sv/h)
0. 038

<The unit is μ Sv (microsieverts) and the figure is an hourly value.>

<Readings Monitored>

Date	Average	Lowest	Highest
Fiscal 2013	0. 039	0. 026	0. 070
Fiscal 2012	0. 040	0. 033	0. 063
Fiscal 2011	0. 041	0. 036	0. 067
March 12~31,2011	0. 055	0. 036	0. 107
Fiscal 2010 (Based on data till Feb. 2011)	0. 038	0. 030	0. 083
Fiscal 2009	0. 038	0. 032	0. 063
Past normal levels	0. 038	0. 030	0. 097

※ The past normal levels above are calculated using readings from April 2006 to February 2011.
